CINECITTÀ

REGENERATION

Cinecittà is well aware that taking action to restrain the ongoing climate change and environmental crisis is a fundamental duty today, as an individual and a society. The health of the future generations depends on this.

We have launched a serious and rigorous scientific plan to gradually reduce our impact on the ecosystem and achieve the net-zero emissions by 2050.

To reach this ambitious goal, we need the **active participation of the entire community** living daily in Cinecittà, from employees, to visitors, to professionals and to customers and suppliers, whom we host every day in our sound stages and spaces, to create and “shoot” the stories of tomorrow.

Here are some simple guidelines we strongly recommend, to help make **Cinecittà more beautiful and more respectful of our planet.**

Thank you for your important contribution,

and welcome to Cinecittà!

MOBILITY AND TRASPORTS

- ⊙ Reach Cinecittà by **shared or collective means** (subway, bus, tram).
- ⊙ Choose **Video Conference meetings** to reduce travels.
- ⊙ Move around Cinecittà by **foot, bike** or **electric minicar**.
- ⊙ Use **low impact** couriers and deliveries (bike or electric vehicles).
- ⊙ Choose **electric/hybrid taxis**.
- ⊙ Rent **electric/hybrid** cars and no less than **Euro 6** technical vehicles.
- ⊙ Travel through Italy by **train**, using airplanes only for international travels, possibly direct flights.

POWER

- ⊙ Cinecittà is powered by **100% renewable energy**, thus always use grid energy and never make use of portable generators.
- ⊙ In case higher power should be needed, use alternative **low-impact** generators (hybrid, electric, photovoltaic, alternative fuel).
- ⊙ Use **low consumption** and **LED light bulbs** only (both inside and outside Cinecittà).
- ⊙ Use **rechargeable batteries** only.
- ⊙ Make sure to **close the doors of the sound stages** when the air conditioning is switched on and to **switch off all the electronic devices** when not in use.

ACCOMMODATION

- ⦿ Choose accommodations located **within 10 km from Cinecittà**, possibly around Via Tuscolana in order to take advantage of the direct bike paths to the Studios.
- ⦿ If lodging in the city center is necessary, choose areas near a **Line A subway stop** in order to reach the Studios by subway (the subway stop “Cinecittà” is located in front of the Studios).
- ⦿ Favour **low-impact** accommodations (i.e. residence, apartments, 2 or 3-stars hotel, or low-impact certified hotels).

MEALS AND WATER

- ⦿ Favour **Cinecittà’s canteen service**, for a lower impact compared to an external service.
- ⦿ If external catering is needed, it should be carried out exclusively through **washable or compostable containers**. Moreover, require a **vegan or vegetarian meal** at least once a week.
- ⦿ We invite you to collect and send any **leftover** food to **charity associations**.
- ⦿ Avoid any kind of disposable water solutions. **Water bottles** are particularly suggested. You can find **water dispensers** through all the site.
- ⦿ For warm drinks, choose **washable glasses**.
- ⦿ Favour **blend of roasted coffee beans**, in place of capsules, and possibly coffee with the **certificate “equosolidale”** (fair trade). Alternatively, choose compostable coffee pods.

MATERIALS

- ◎ Adopt a **paper reduction policy** and always favour digital solutions. If necessary, always use recycled paper, at least FSC, PEFC, Ecolabel UE certified paper, and print on double-sided, black and white.
- ◎ When building sets, always request **FSC or PEFC certified lumber**.
- ◎ Use **Low VOC paints** and possibly certified with a well-recognized, accredited label.
- ◎ **Recover and use existing materials**: rental, used, or existent material that can be found in Cinecittà's or other warehouses.

WASTE

- ◎ Adopt a **zero-waste policy**.
- ◎ **Properly differentiate** the waste produced daily by using the recycling bins provided by Cinecittà in the interior spaces.
- ◎ Make sure to properly dispose any kind of **special waste**, like those deriving from the building of sets. If you don't know how, ask us.
- ◎ Before disposing of props, **ask us** (as we could reuse them) or we invite you to donate them to organizations or companies that deal with their recycling / reuse.

COMMUNICATION

- ◎ Avoid messages and behaviours **which may damage the environment** and possibly promote the sustainability principles within your organization.
- ◎ Ensure to **communicate our "green standards"** to your co-workers.
- ◎ **Share** your virtuous initiatives and messages **with us**. We can communicate together: a shared message will be well stronger!
